- Management challenges
- Lack of career planning
- Heavy workload
- Lack of confidence
- Lack of support

- Broad range of challenges & needs
- The most benefit is realized from individual & personalized development

- Trust needs to be established before they feel comfortable addressing issues

Menttium has a comprehensive on-boarding process for our mentees. We get to know each mentee personally and professionally, and support each individual in identifying their top three focus areas for their mentoring experience. We then **identify the right mentor** to support each of those areas. Every unique match is designed to support the individual's leadership development goals.

The **Zone of Proximal Development** is the “sweet spot” for learning. It is the space between what a learner can do without assistance and **what a learner can do with guidance**.
